Picnic Pals — Voice Recording Script

Hi grown-up! The arcade already talks, using friendly built-in voice clips (computer-generated, in `audio/voice-tts/`). Every line you record replaces that line with your voice — you can do a few at a time, in any order, and the grown-up area shows each line as "your voice", "built-in clip" or "computer voice".

The short version

1. Start with the **Record first** sections: **1121 lines** (roughly 20–30 minutes). Everything else is for upcoming games and can wait.
2. Record **one line per file**, using the exact **file name** in the table (e.g. `munch_rule_make.m4a`).
3. Say it **cheerfully**, a little slower than normal, and leave a **short pause** (about half a second) before and after.

Tips

- Quiet room; soft stuff around you helps (a closet full of clothes is perfect). Fans and TV off.
- A phone voice memo is totally fine. Hold the phone about a hand-width from your mouth, a little to the side.
- Smile while you talk — kids can hear it.
- Numbers and little words ("plus", "is", "That's") get stitched into sentences, so say them in an even, middle-of-a-sentence tone — not like a question, not too final.
- Lines marked "+ number" are followed by a number clip. Say them as if a number comes next: "Munch the ones that make…".
- Made a mistake? Just re-record that one line. Nothing else changes.

Two ways to add recordings

A. In the app (easiest). Press and hold the gear (top-right corner) → answer the grown-up question → **Voice recorder**. Every line below is listed with **● Record / ▶ Play / Re-record**. Recordings are saved in that browser on that device. To move them to another device (e.g. laptop → iPad): **Export (.zip)**, then **Import** on the other device.

B. Record on your phone, send files. Name each file exactly as in the **File name** column (any of .m4a, .mp3, .wav or .webm is fine, e.g. `num_7.m4a`). Then either import them in the Voice recorder (it takes a zip or a bunch of audio files at once), or drop them into the website's `audio/voice/` folder and run `node tools/make-voice-manifest.js` (or `python3 tools/make_voice_manifest.py`) so the games know they are there.

How sentences are built

KIDS HEAR	BUILT FROM
"Munch the ones that make 7!"	`munch_rule_make + num_7`
"Yum! 3 plus 4 is 7!"	`fb_yum + num_3 + w_plus + num_4 + w_is + num_7`
"Oops! That's 5, not 7."	`fb_oops + w_thats + num_5 + w_not + num_7`
"Welcome back! What do you want to play?"	`hub_welcome_back + hub_pick_game`
"Hooray! You got 3 stars!"	`fb_hooray + fb_you_got + num_3 + fb_stars`

A sentence plays in your voice once every piece is recorded; until then it uses the built-in clips.
